Awards and Prizes / BSC 1930 - 2030													

The coach meeting will also be available via ZOOM. Details will be published with Bulletin #6.

Shake, Shake, Shake ... Out

At the Contest, there will be an environment shake-out session – each team will be given a check-list of tasks to perform to test the environment. This is a very important task for both contestants and the contest staff. Teams get to make sure their workstations and connections are working, and the contest staff gets to make sure things are in place from their end. Please be sure you arrive on time (but not before 8:30 a.m.) to participate in this activity.

TEAMS: Be sure you know: stdin ... stdout ... eof ... eof

ONLINE PRACTICE - For anyone who wants to spend additional time in the contest environment, you can still practice with the appliance. An open practice contest will be running unattended from Monday morning until mid-day on Thursday at the same web site. The same problems will be available for practice, with DOMJudge auto-judged decisions.

COACHES: Team registration / editing has been turned off in the ICPC registration system, so the Registrar can print badges, lists and other contest materials. If you have a necessary change, send it to the Registrar.

Contest Environment (tested on VirtualBox 6.1 and 7.0), Warmup Packet, and Live Update

<http://socalcontest.org/f37-icpcsocial.ova>

contest dev appliance, pw=icpcpw

To use, install VirtualBox, run VirtualBox Manager, File/Import Appliance...

Sluggish performance? Increase settings to at least 4 GB RAM and 2 virtual CPUs.
